PROFILE

I am an enthusiastic UI/UX designer with a sharp sense of detail and a strong preference for user-centric aesthetics. My work focusses on developing intuitive and engaging digital experiences that are in line with user needs and brand objectives. As a UI/UX intern, I am eager to use my creativity and problem-solving skills to create effective solutions while staying up to date on the newest design trends and tools.

CareerPulse Mobile Application

CareerPulse is a mobile application developed by an academic group project for the University of Sri Jayewardenepura, purposed to support students in their internship journey. It provides personalized skill development suggestions, targeted matching of internships using the API from LinkedIn for CV analysis. The platform is built using Flutter, Dart, Firebase, and OpenAI, so it provides users with seamless intelligent solutions that enhance their career readiness by connecting them to opportunities that will align with their aspirations.

Tech Stack: Flutter, Figma, Firebase

SparkChat Real-time messaging platform

SparkChat is an innovative messaging platform developed for the Innovate With Ballerina event by IEEE SBUOM, IEEE CS UOM, and WSO2. It uses React as the frontend and Ballerina as the backend in solving issues related to real-time communication and cross-device message synchronization. The key features include instant messaging based on WebSockets, secure authentication of users using JWT, and MongoDB for scalable data management.

Tech Stack: React, Ballerina, Figma

QuiziFy - Quiz Mobile App

QuiziFy is a Flutter-based mobile app for creating, taking, and evaluating quizzes, featuring dynamic question selection and a user-friendly interface. It uses the MVC architecture, Repository pattern for data handling, and Singleton patterns for session and UI management. Developed with Flutter using VS Code and Android Studio, it integrates GitHub for version control and CI/CD, ensuring seamless collaboration and functionality across Android and iOS devices

Tech Stack: Flutter, Figma
